

PRODUCTS DATA SHEET

Beautify Your Wall.

Titiantouch revolutionises the light switch. Offering a range of touchplates in an array of designs, materials, finishes and colours. Our system is easy to install, is suitable for wet areas and comes standard with an industry first 2-way memory dimmer. Each touchplate is customisable and it is up to you to decide which plates in which combination you would like on your walls.

OUR MISSION IS TO BEAUTIFY YOUR LIFE thru DESIGN & TECHNOLOGY.

The Titiantouch team, comprising of senior architects and engineers from around the globe, brings to you a revolutionary solution that seamlessly integrates design and technology to the simple rocker switch. Our goal is to provide an aesthetic solution to the ubiquitous age old rocker switch, that designers can elegantly integrate into their creations.

For nearly a decade, we have improved and implemented our proprietary technology to provide safe, smooth and accurate touch solutions. Our digital switch, brings lighting control to the modern era. No moving parts reduces the size of the switch, and programmable touch input lets users customize controls for on/off switching, as well as intensity. These engineering efforts made it possible for architects and designers to create unique aesthetic touchplates for individualised designs.

THE UNSEEN TECH.

Our technology safely works behind the scenes that you create. Behind every beautiful touchplate lays a sealed low voltage Sensor hard mounted thru the wall and communicates with a Controller located near the apparatus to be controlled via low voltage cables. This separation of Sensor from Controller creates a safer environment by allowing high voltage equipment to be placed away from the user, as well as minimizing the footprint and optimizing the position of the touchplate.

UNDERSTANDING CODES

Each Titiantouch's touchplate comes with an item code. Understanding the code will let you quickly reference the Material, Finishing, Surface Coating and Colour of the touchplate. Here we introduce the code structure.

MODULAR COLLECTION

COMING SOON!

TRADITION
MEETS INNOVATION.

For ease of upgrade to touch life, our new Modular Collection is the best choice. Designed to directly replace existing rocker panels for enjoyment of our new technology.

TOUCHPLATES

Combine 1U, 2U and 3U Touchplates freely on our choice of 9u or 6u Baseplates, to customise the look and number of switches.

SENSOR

Each Touchplate comes with its own sensor.

BASEPLATES

The baseplate is designed to directly screw mount to most international electrical box dimensions for ease of installation and renovation.

MDFPSS1ULNBR01

B PART		C MATERIAL	D UNIT	E PATTERN	F FINISH
FP	FACE PLATE	SS	1U 1 UNIT (ONE)	DD	BR
BP	BASE PLATE	BR	2U 2 UNIT (TWO)	DL	CU
LP	LIGHT PLATE		3U 3 UNIT (THREE)	LN	NB
				SQ	

TOUCHPLATES

ALL MODULAR COLLECTION TOUCHPLATES HAVE BEEN INTEGRATED WITH SENSORS.

3 X 3
MDBPPB9G01

POLYMER BLACK
9 GRID
100wx100h mm

Supports up to 9 x 1U Touchplates or
3 x 3U Touchplates.

3 X 2
MDBPPB6G01

POLYMER BLACK
6 GRID
100wx65h mm

Supports up to 6 x 1U Touchplates or
2 x 3U Touchplates.

SENSOR

The Sensor Mount is a programmable capacitive touch sensor. Intuitive touch inputs by the user relay signals to the control box, communicating different actions to be implemented. In standard mode, the sensor is setup for a Quick touch to turn on or to turn off your lights, and long holding touch to activate dimming functions for adjusting lighting levels to your desire.

SENSOR MOUNT INSTALLATION GUIDE

WARNING! BE SURE POWER TO THE SWITCH IS COMPLETELY SWITCHED OFF BEFORE INSTALLATION

1. Preparation, preplan the location of your sensors and control box, and loosely run enough communication cable from the control box to the desired sensor position with 200mm excess at each end for ease of installation and check continuity. Although no conduit is required for low voltage wiring, it is recommended for ease of maintenance and protection from pests.
2. Minimum cable requirement is low voltage 4p ribbon cable. For cost effectiveness and performance, insulated non stranded (solid wire) Ethernet cable CAT 5 is recommended.
3. Carefully locate and drill a 20mm diameter hole for the sensor mount. Please refer to drilling templates for best positioning of touchplate patterns. Please ensure that the communication cable can be easily accessible after the whole is drilled.
4. Pin and connect the sensor cable with the quick connect male 3M miniclip connectors; which can be purchased from your Titiantouch supplier. When pinning opposite ends of the cable, mirror the wire colours. Note, ensure cable overrun is not excessive to

prevent entanglement when sensor is mounted in to wall.

5. Connect the Sensor Cable to the Controller
6. Connect the Sensor Cable to the Sensor.
7. Carefully Push the sensor mount into the wall until the back O ring seats snugly into hole, and the Stainless Steel mount plate rim is exposed.
8. Lightly seat the expansion mount by tightening the hex screw in the middle of the Sensor Mount, do not set final tightness at this time. Torque to 2 pounds.
9. Align Touch Plate to the Mount plate by lining up the hex keys, but do not fully push the Touch plate into the mount plate. With the plates' hex keys aligned, turn the Touch plate until the desired orientation is achieved.
10. Remove the Touch plate, and torque the screw to a final 5 pounds, or until the Sensor Mount is firmly seated in the hole.
11. Finally mount the Touch Plate.

CONTROLLER

The controller reads, interprets, and acts on the signals communicated by the sensor(s). Two sensor input connectors allow the system to be set up as a two way switch. Standard LED 0-10V dimmable driver connector, when connected, enables the integrated 2-way memory dimming function.

For further technical information please refer to titiantouch's web support page.

CONTROLLER INSTALLATION GUIDE

WARNING! BE SURE POWER TO THE SWITCH IS COMPLETELY SWITCHED OFF BEFORE INSTALLATION

1. Connect L power cable of the Controller (brown) to the L power from breaker box.
2. Connect N power cable of the Controller to N power.
3. Connect ON/OFF of the controller to the L of the LED driver. And connect N of LED driver to the N power. (One Controller can control up to equivalent 300W LED lights and drivers, if you have several drivers, repeat this step.)
4. Connect 0-10V dimmer cables to the dimmable LED driver if applicable. (standard optional function.)
5. Connect the sensor cable(s) that you laid out previously when installing the sensor mount(s). Two Sensor connectors are provided, but only one connection is required. (Sensor ribbon cables should not be squeezed or stretched)
